## Questions :

- Est-ce que le Lézard des souches decline dans le Grand Est ?
- Le réseau d'aires protégées est-il suffisant pour cette espèce ?

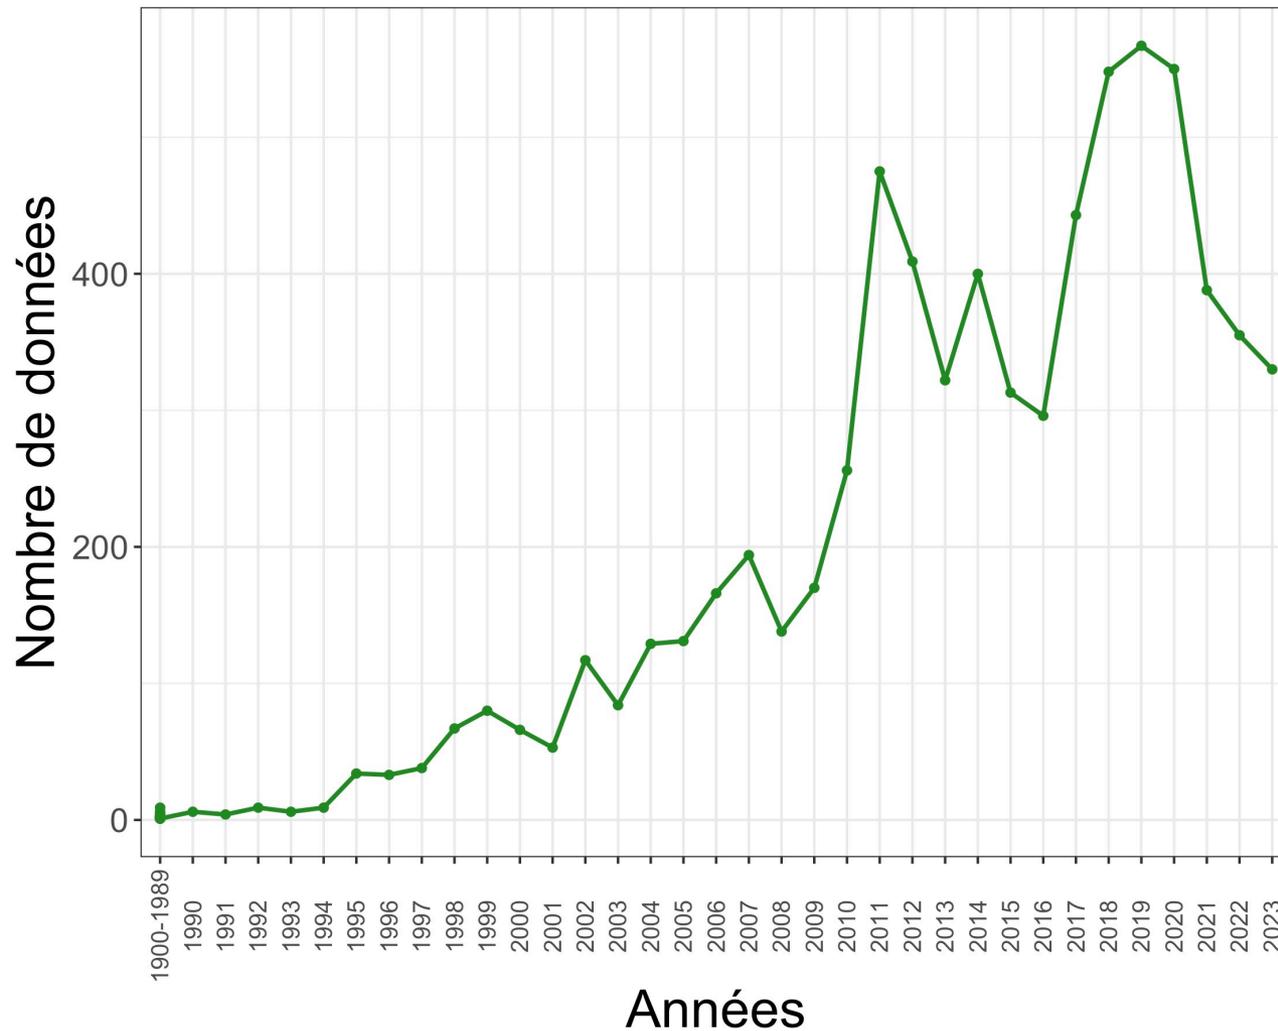

# Grand Est

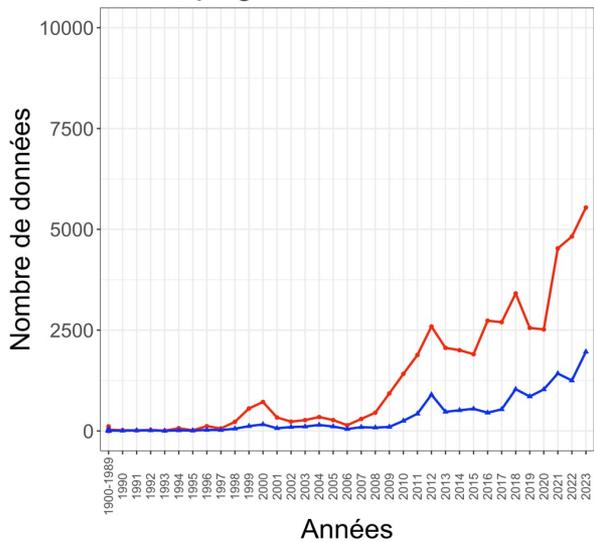

Source données : faune-champagne-ardenne, BDD BUFO, faune-alsace, CRA-CEN Lorraine

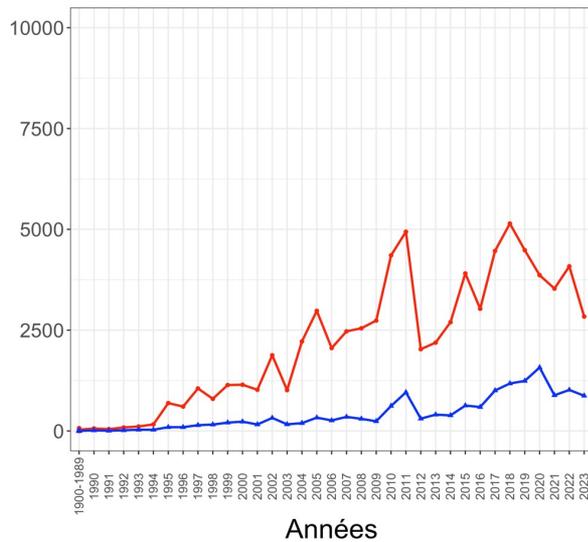

# Grand Est *Lacerta agilis*

## Est-ce que la population décline ?

- Difficile à dire, mais tendance ↘ en Lorraine.
- -> Mise en place d'un suivi. Comment faire ?
- Que faire ? Comment intégrer ces informations dans les plans de conservation ? Plan d'action (**PRA trame thermophile**) ?

This document will not be distributed at the meeting. Please bring this copy.  
Ce document ne sera plus distribué en réunion. Prière de vous munir de cet exemplaire.

**Plan régional d'actions  
en faveur du Lézard des souches  
*Lacerta agilis* Linnæus, 1758  
en région Centre-Val de Loire**

2022-2031

Association Naturaliste d'Étude et de Protection des Écosystèmes CAUDALIS  
Direction régionale de l'Environnement, de l'Aménagement et du Logement Centre-Val de Loire  
Région Centre-Val de Loire

## Causes du déclin :

- Déclin des insectes ?
- Fragmentation ? Dérive génétique ?
- Changements globaux ?
- Dégradation des habitats (e.g., friches, haies...) ?
- Pratiques de gestion ??
- Pollution ??

## Déclin d'une espèce commune ?

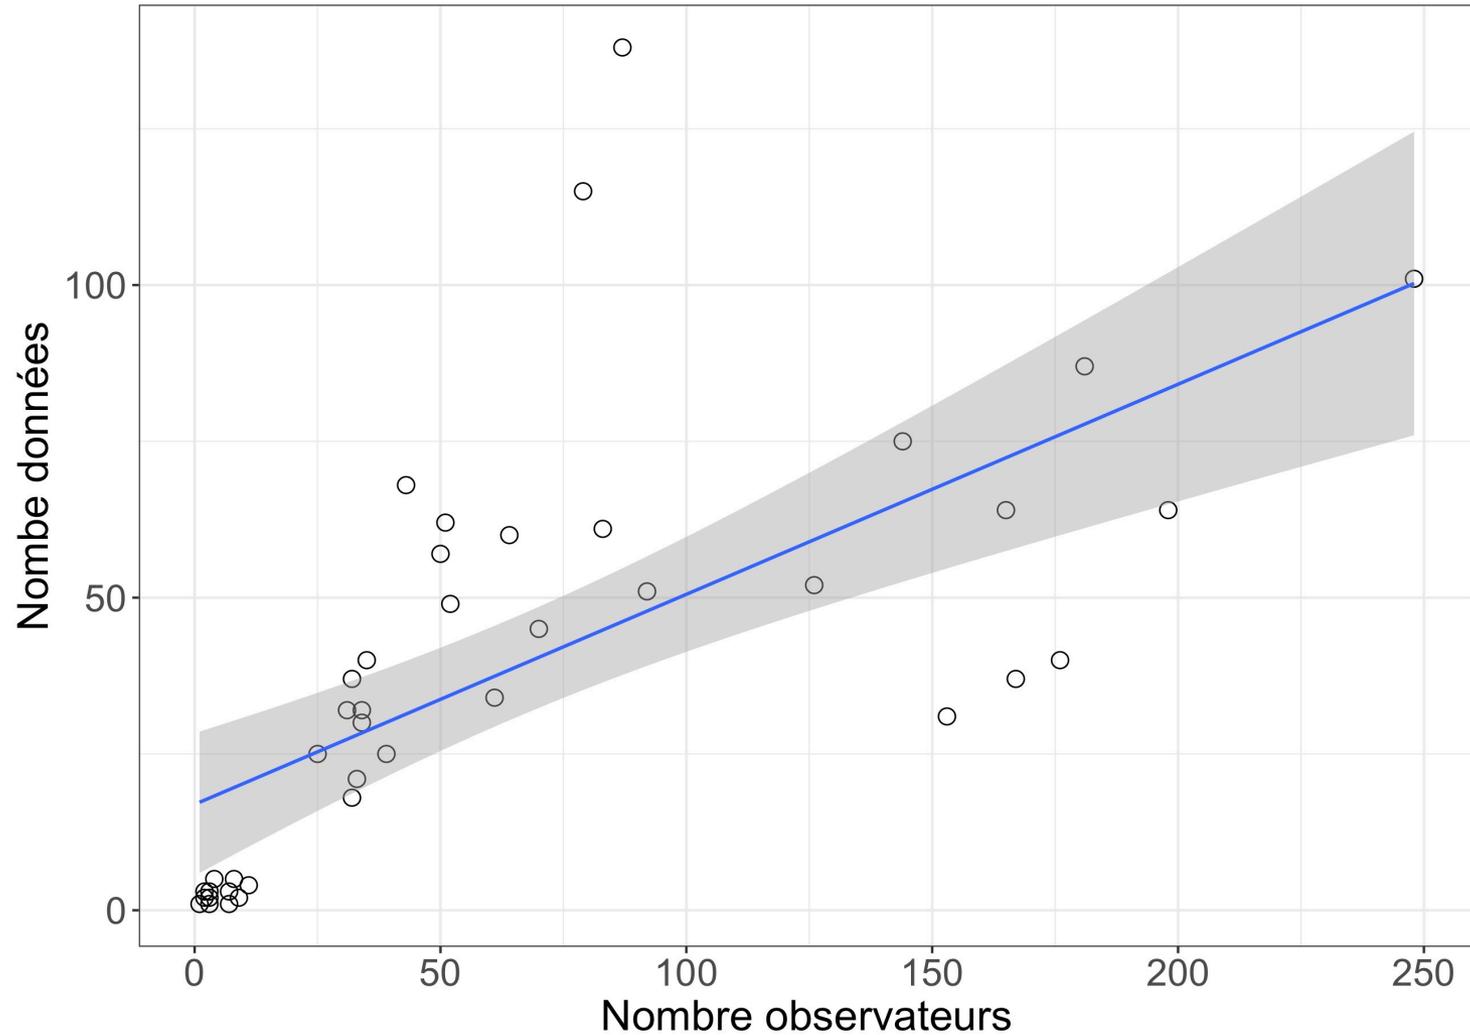

- Difficulté à renseigner le statut des espèces communes
- Continuez à enregistrer vos données dans faune-grand-est !
- Définir quelques sites pilotes pour un suivi (RNR ? Sciences participatives ?)

Merci pour votre attention !
